

Employee access the menu list to see all available pizzas. Adds ordered item(s) from the list to customers' orders by inputting the pizza number. The employee adds as many pizzas to the order as the customer wants. If the customer wants to remove or add a certain ingredient, a note can be added to the order. If the customer wishes to fetch order at a specific time, the employee sets a pick up time. Employee confirms the order by adding it to the order list.
